This Innermetrix DISC Plus Profile combines the best of two world class profiles. The DISC Index measures your preferred Behavioral style and the Values Index measures your motivational style and drivers. Together they will help you understand HOW you prefer to get things done, and WHY you're motivated to do them. This level of self-awareness and discovery are the core to achieving peak performance in any role or endeavor, to ensure that you properly align what you do best with how you do it and why.

The DISC Index

HOW do you prefer to use your talents based on your natural behavioral style?

Natural and Adaptive Styles Comparison

Poojan Shah

Natural Style: The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

Adaptive Style:

The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

A closer look at the four components of your behavioral style
